

Treasury Browser Installation Guide (MAC)

Prosperity Bank's Treasury Browser provides a modern, highly secure way to access Prosperity Bank's Treasury Center online banking platform. Treasury Browser allows for the strongest multi-factor authentication of the user and device, providing layered identity protection. With anti-keylogging, advanced fraud prevention, and automatic updates every two weeks, Treasury Browser safeguards high-risk treasury activity.

Operating in an isolated browser, Treasury Browser does not use any other internet browser on a user's computer, thereby providing protection from malware that might be attached to other browsers used. Access is limited to bank-approved websites and applications, ensuring a controlled and secure user experience while preventing navigation to unauthorized sites.

Each Treasury Center user will download Treasury Browser and use it in the same manner as other web browsers but within a more secure, bank-managed environment. Treasury Browser is Prosperity Bank's solution for conducting your online banking financial transactions safely through Treasury Center.

Getting Started

Before beginning the Installation of Treasury Browser, ensure you have the following to complete the installation:

- An Apple Mac computer which meets the minimum system requirements
- An internet connection
- Administrative user privileges to your computer
- If you have a proxy server installed on your network, you will need to click on Manual Proxy Configuration, enter the proxy server's IP address and whitelist.

Prior to installation, save any open work and close all other computer applications. A computer restart might be required for the installation of Treasury Browser. After installation, you will not need administrator rights to use the Treasury Browser software.

System Requirements

MAC Operating Systems

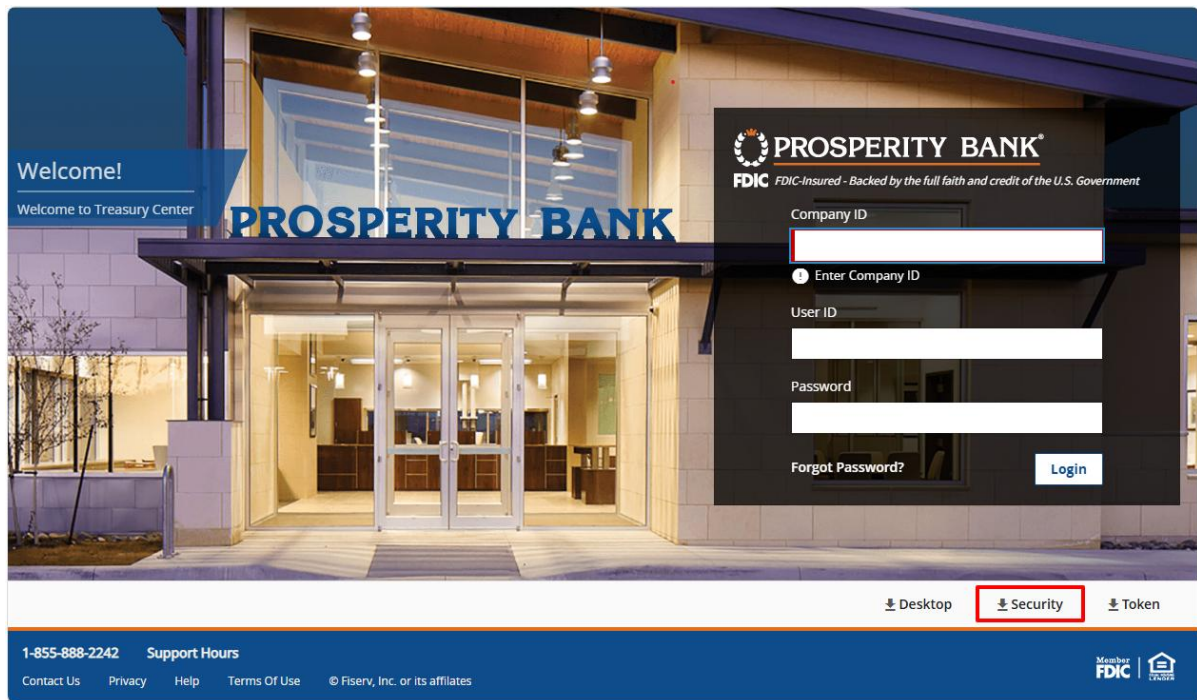

- Any version of Apple macOS still receiving support from Apple
- At least 8GB of RAM
- 20GB of available disk space

Treasury Browser does not support network connections that utilize TLS inspection.

Installation

1. To begin downloading Treasury Browser, select the Prosperity Bank Treasury Browser hyperlink below, or go to prosperitybankusa.com, select the Treasury Center login option, and click Security in the bottom right corner.

<https://prosperity.olbanking.com/corporate>

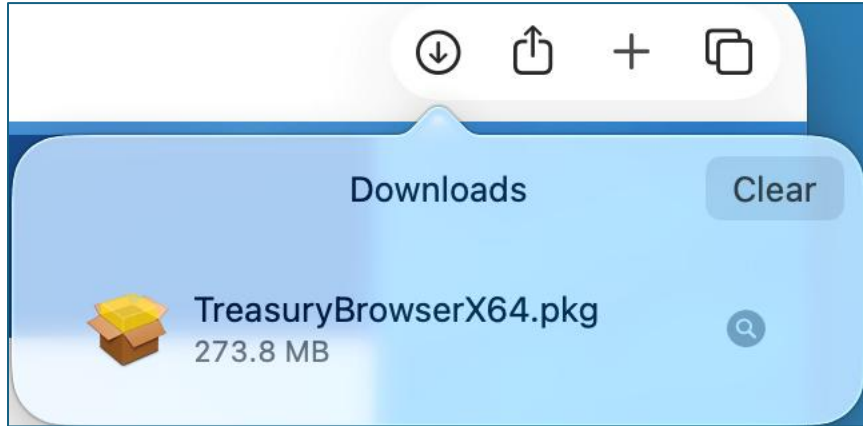

2. Select the Prosperity Bank Browser link designated as “Security” to begin the download process.
3. You will need administrative access to complete the installation, ensure you have these credentials before beginning the process.
4. On the following screen, select Allow

Do you want to allow downloads on
“prosperitycert.olbanking.com”?

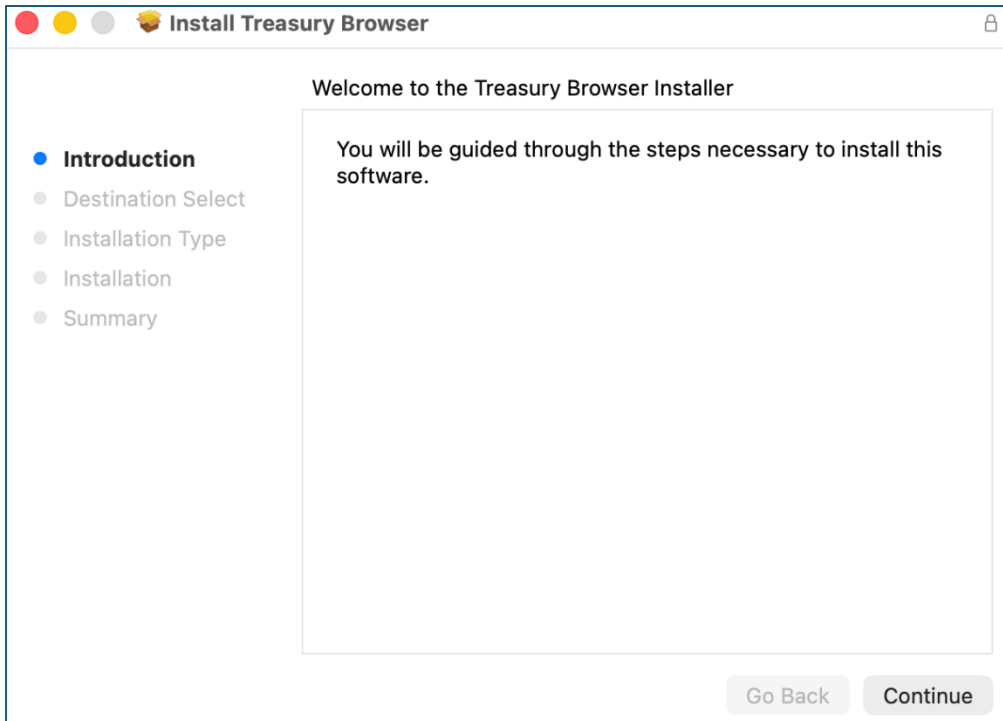

You can change which websites can download files in the
Websites section of Safari Settings.

Cancel Allow

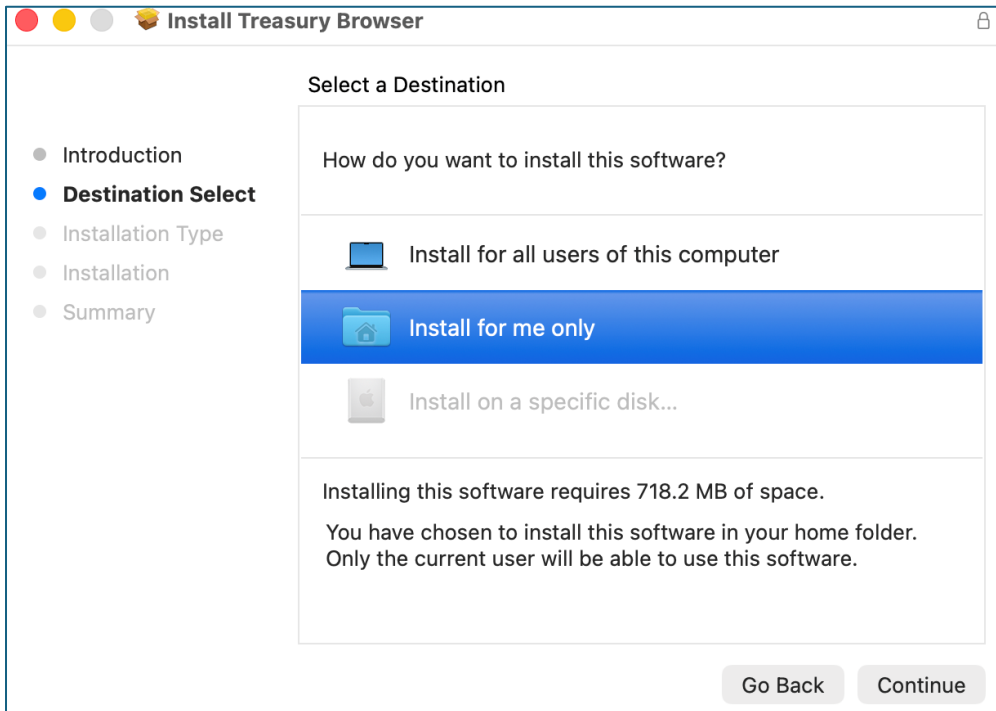

5. Once the download is complete, navigate to your *Downloads* folder to launch the installer.

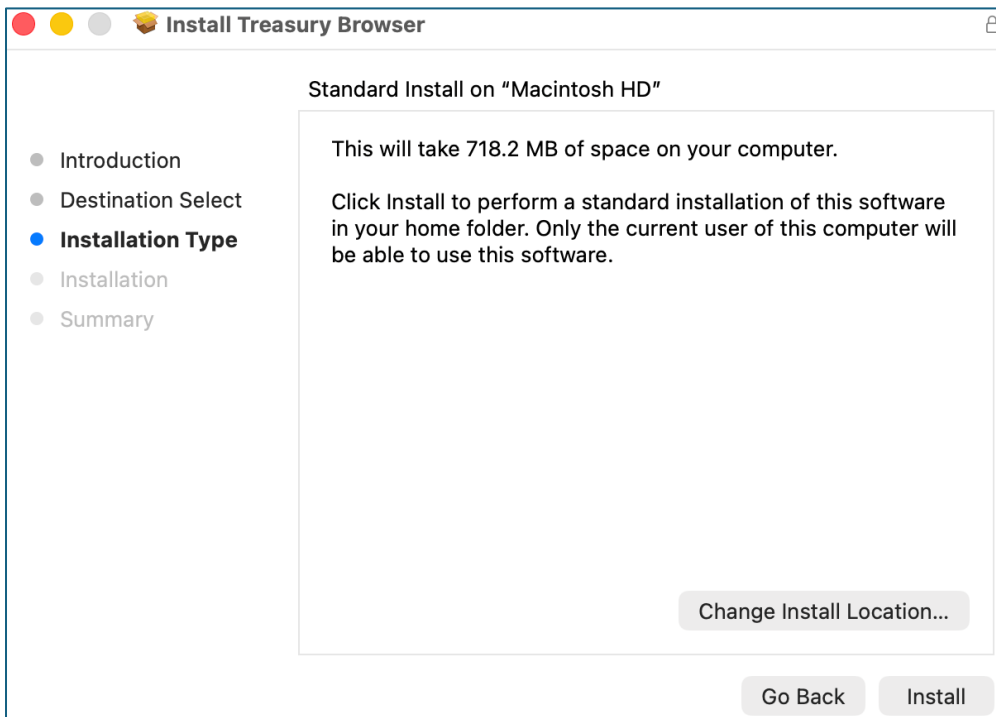

6. The Prosperity Bank Treasury Browser installer will guide you through the installation steps. Click continue.

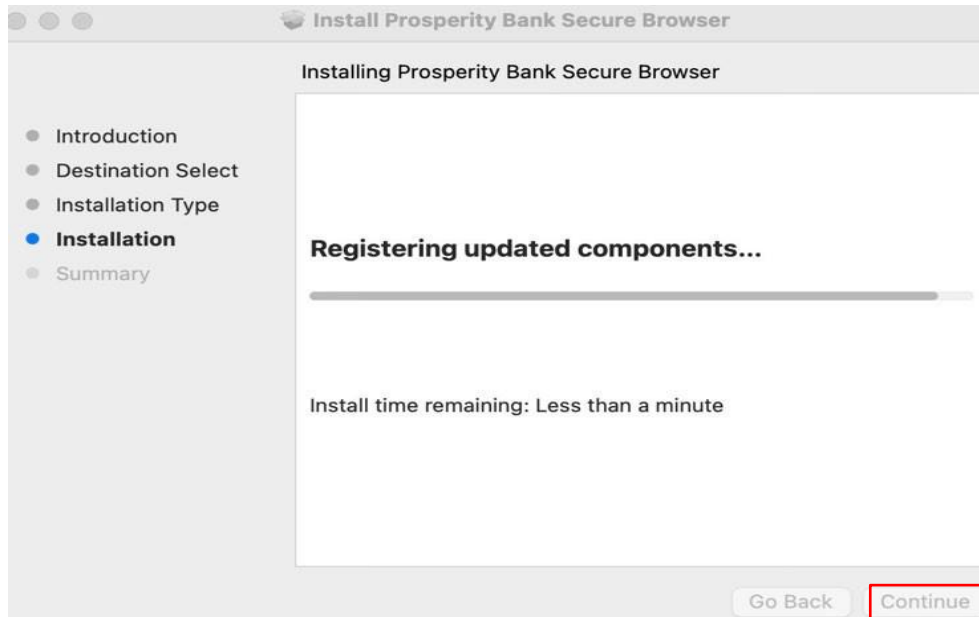

7. Select a Destination for the installation of the Treasury Browser software. Click Continue.

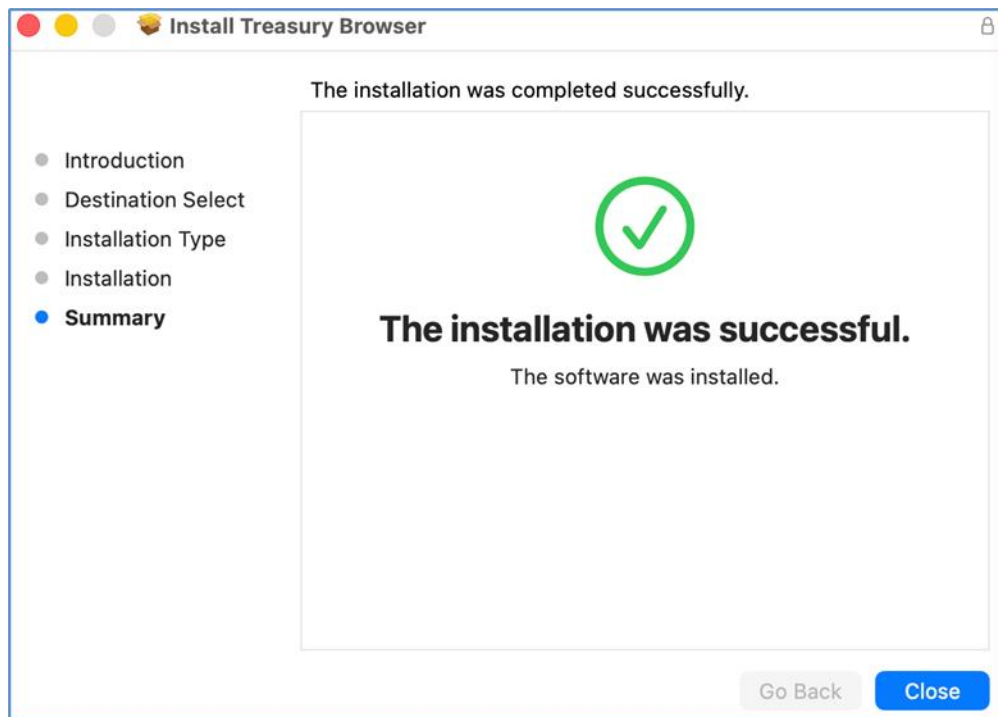

8. Select Install to begin the Treasury Browser installation.

9. Installation is in process. When complete, click Continue.

10. Installation is now complete. Click Close.

11. To retain in the current location, Click Keep.

Software Activation

After the installation is complete, the Prosperity Bank Treasury Browser icon will appear in the application folder. Double click on the Treasury Browser icon to launch.

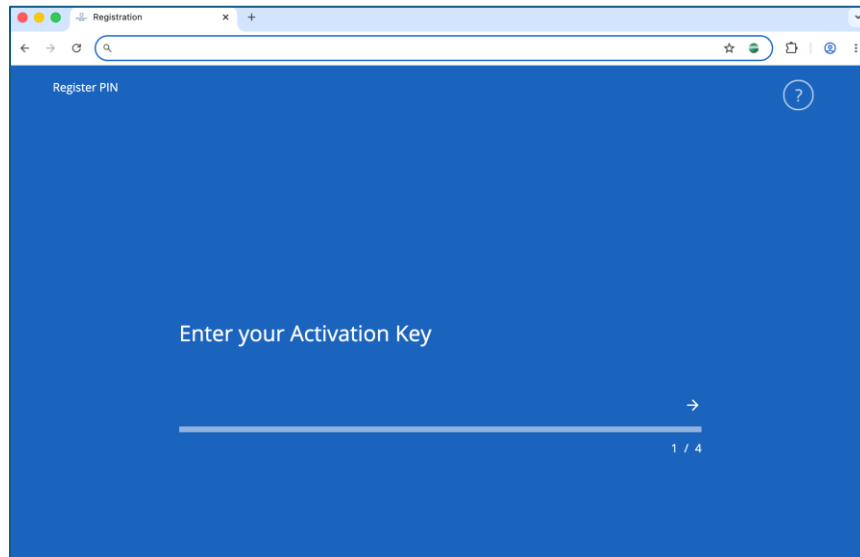

Registration

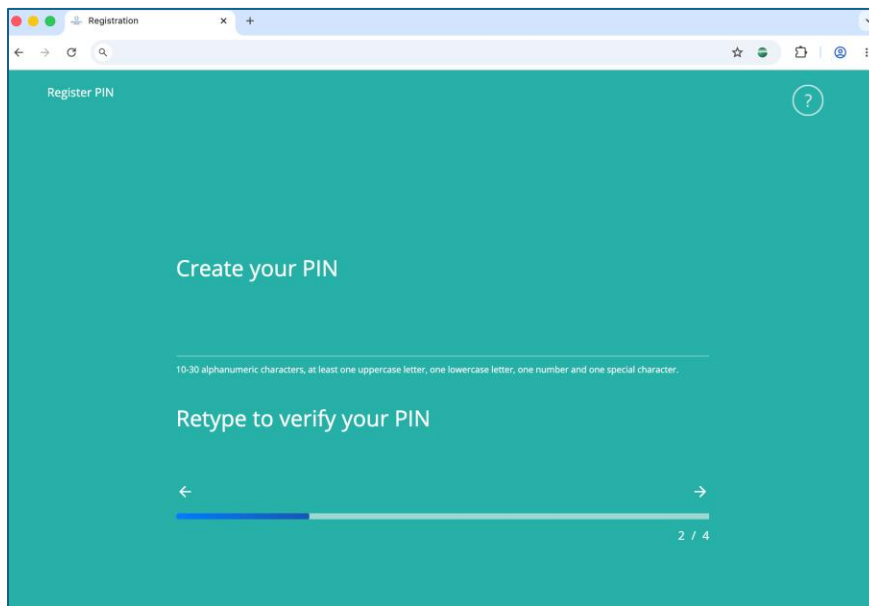

1. Launch the Treasury Browser icon and click Start.

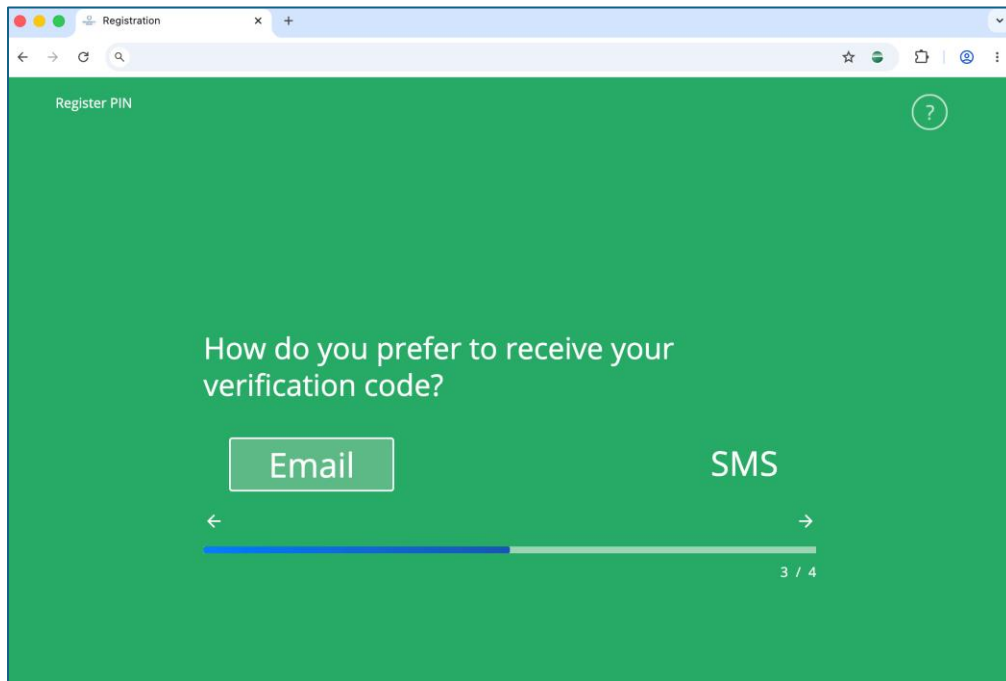

2. Enter the Activation Key provided by the Lead Admin of your Treasury Center profile. After entering the Activation Key, click on the arrow as shown below to continue.

3. Create the PIN/Password you will use to log in to Treasury Center. A PIN/Password should be 10-30 alphanumeric characters, at least one uppercase and lowercase letter, one number and one special character. You will use this PIN/Password each time you login to Treasury Center.
Prosperity Bank does not have access to your PIN/Password. Users must request an Activation Key and complete the activation process again to create a new PIN/Password.

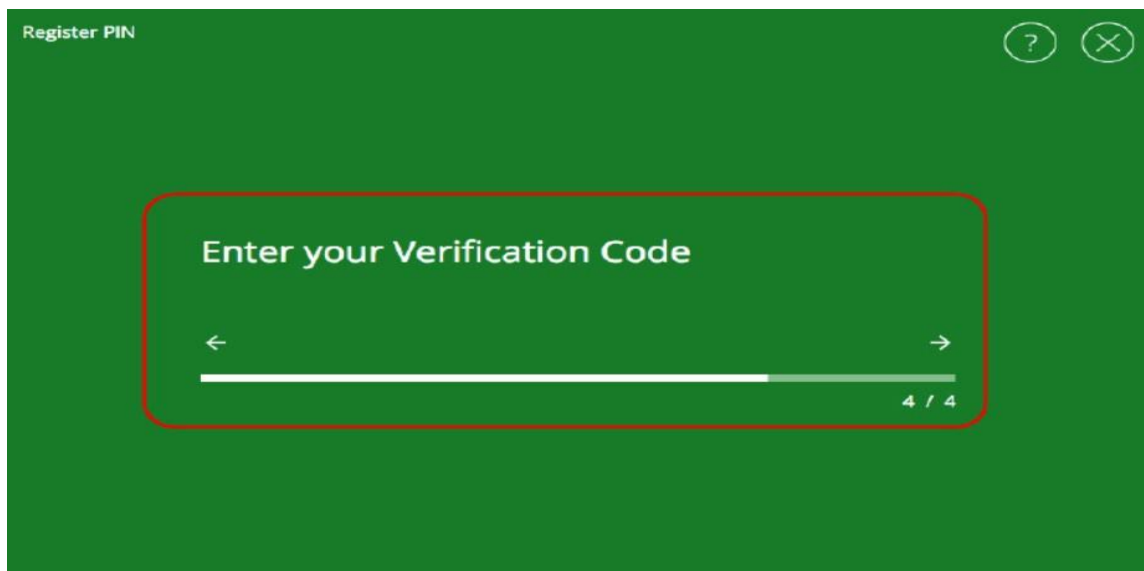

4. To confirm your identity, a user verification code will be delivered to you. Select this code to be delivered via email or SMS, then click the arrow to continue.

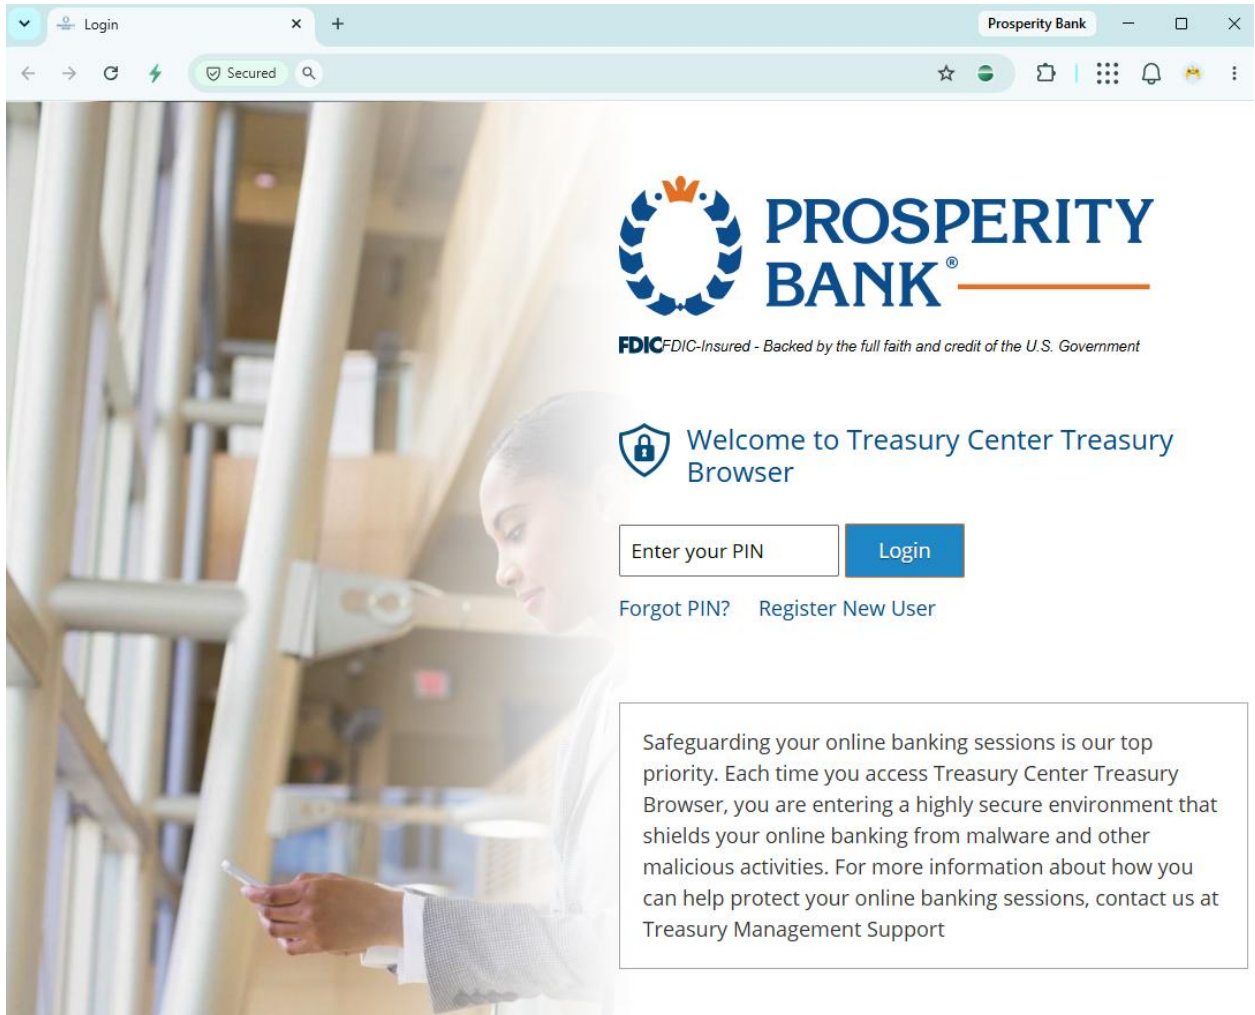

5. Enter the user verification code you received via email or SMS, then click the arrow to continue.

If you do not receive your verification code, contact Treasury Management Support at 855-888-2242 for assistance.

6. The Prosperity Treasury Browser installation and registration are now complete.
7. On the following screen, enter your PIN/Password you created earlier to login to Prosperity Bank’s Treasury Center online banking.

8. Upon login to Treasury Center Treasury Browser, the secured Apps page will display the icons available to the user. Click on Treasury Online to connect to Treasury Center or click on another icon to access another Treasury service.

IMPORTANT SECURITY REMINDER

Prosperity Bank will NEVER ask you for your Treasury Center login credentials.
