

Treasury Browser Installation Guide

Prosperity Bank's Treasury Browser provides a modern, highly secure way to access Prosperity Bank's Treasury Center online banking platform. Treasury Browser allows for the strongest multi-factor authentication of the user and device, providing layered identity protection. With anti-keylogging, advanced fraud prevention, and automatic updates every two weeks, Treasury Browser safeguards high-risk treasury activity.

Operating in an isolated browser, Treasury Browser does not use any other internet browser on a user's computer, thereby providing protection from malware that might be attached to other browsers used. Access is limited to bank-approved websites and applications, ensuring a controlled and secure user experience while preventing navigation to unauthorized sites.

Each Treasury Center user will download Treasury Browser and use it in the same manner as other web browsers but within a more secure, bank-managed environment. Treasury Browser is Prosperity Bank's solution for conducting your online banking financial transactions safely through Treasury Center.

Getting Started

Before beginning the Installation of Treasury Browser, ensure you have the following to complete the installation:

- A Windows PC which meets the minimum system requirements
- Local Administrative privileges on the computer where Secure Browser will be installed.

Prior to installation, save any open work and close all other computer applications. A computer restart might be required for the installation of Treasury Browser. After installation, you will not need administrator rights to use the Treasury Browser software.

Browsers

- Microsoft Edge (Any version currently supported by Microsoft)
- Mozilla Firefox (Version 95+)
- Google Chrome (Version 96+)
- Safari is not officially supported, however, no known issues with the current version of Safari.

System Requirements

- Any 64-bit version of Microsoft Windows still receiving active support from Microsoft
- Any 64-bit capable x86 processor from Intel or AMD that is supported by the version of Windows used
- At least 8GB of RAM
- 20 GB of available disk space

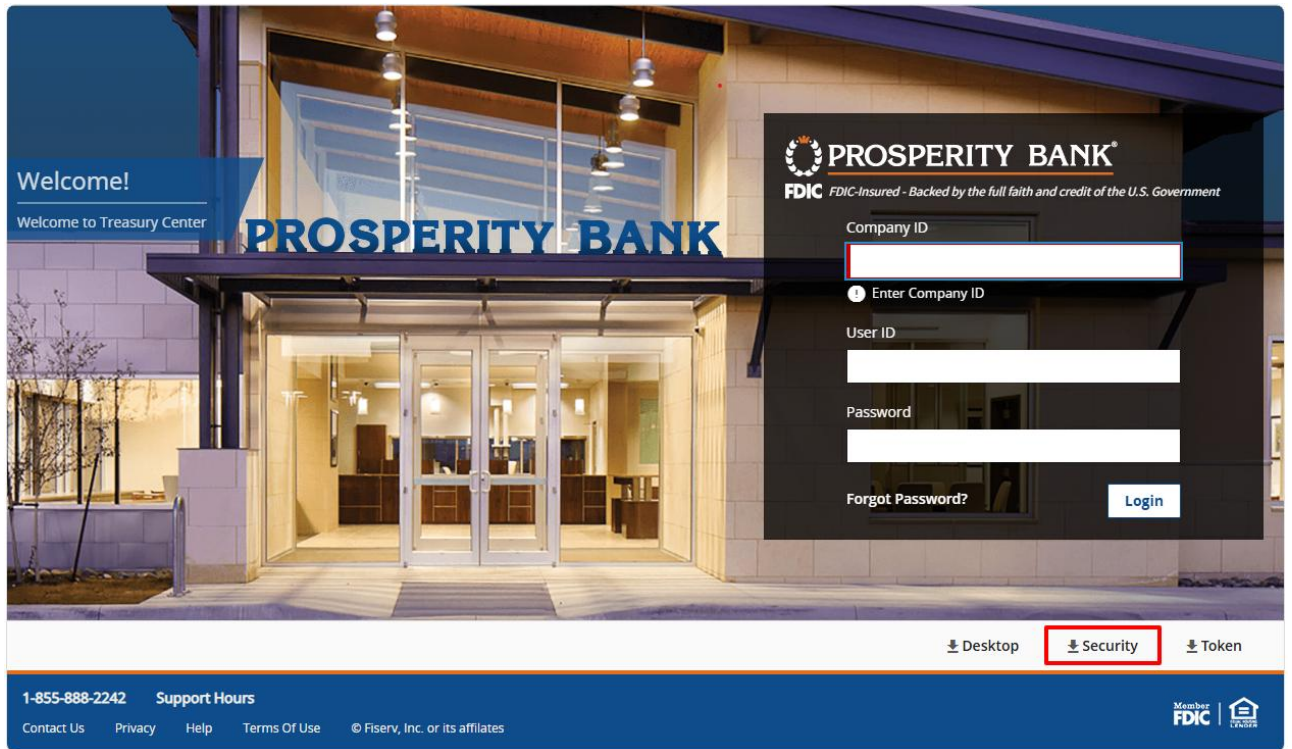

Treasury Browser does not support network connections that utilize TLS inspection.

Installation

Each Treasury Center user should install Treasury Browser on the PC used to access online banking. For multiple users utilizing the same computer, Treasury Browser will need to be installed once, and each user registered within the browser.

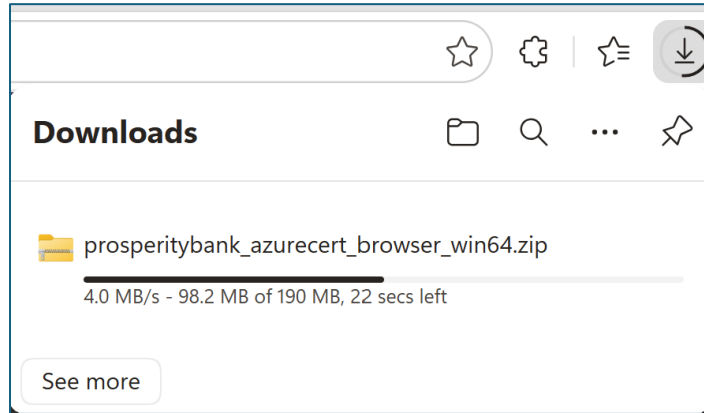

1. To begin downloading Treasury Browser, select the Prosperity Bank Treasury Browser hyperlink below, or go to prosperitybankusa.com, select the Treasury Center login option, and click Security in the bottom right corner.

<https://prosperity.olbanking.com/corporate>

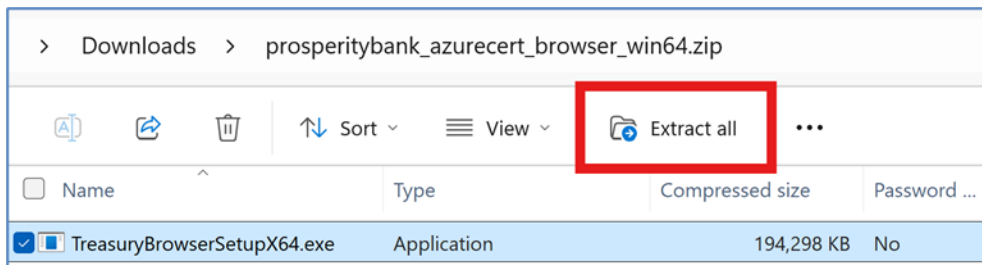

2. Select the Prosperity Bank Browser link designated as “Security” to begin the download process.

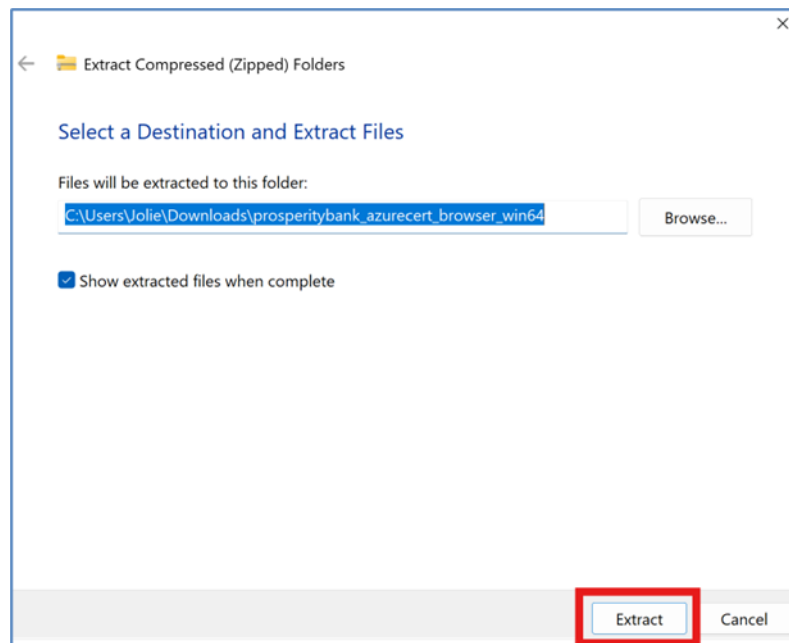

3. The installation file will be downloaded to your computer.

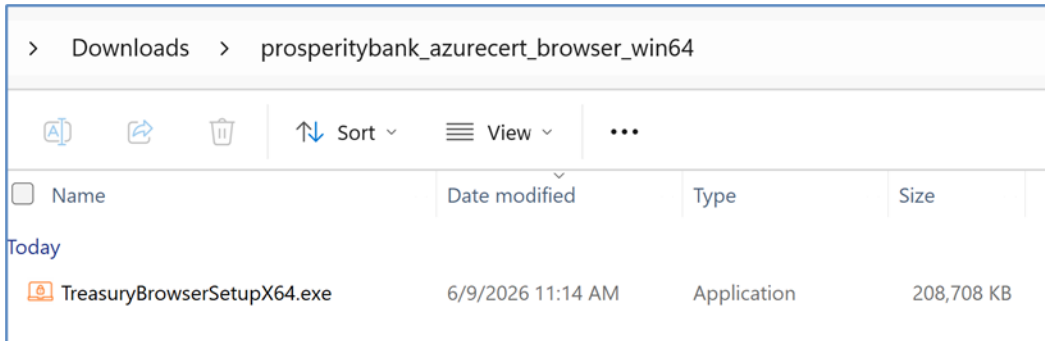

4. Once the download is complete, navigate to your Downloads folder to launch the installer you just downloaded. Click Extract All.

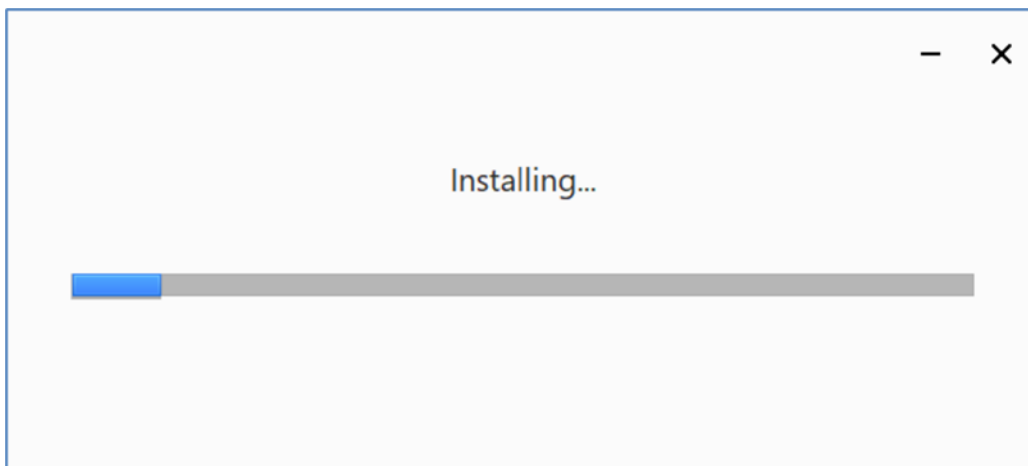

5. The following setup screen will appear. Click Extract to continue.

6. Double click the file to begin installation.

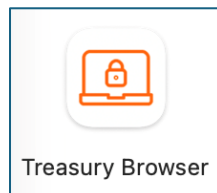

7. Treasury Browser will begin to install. You can view the progress of the installation throughout the process.

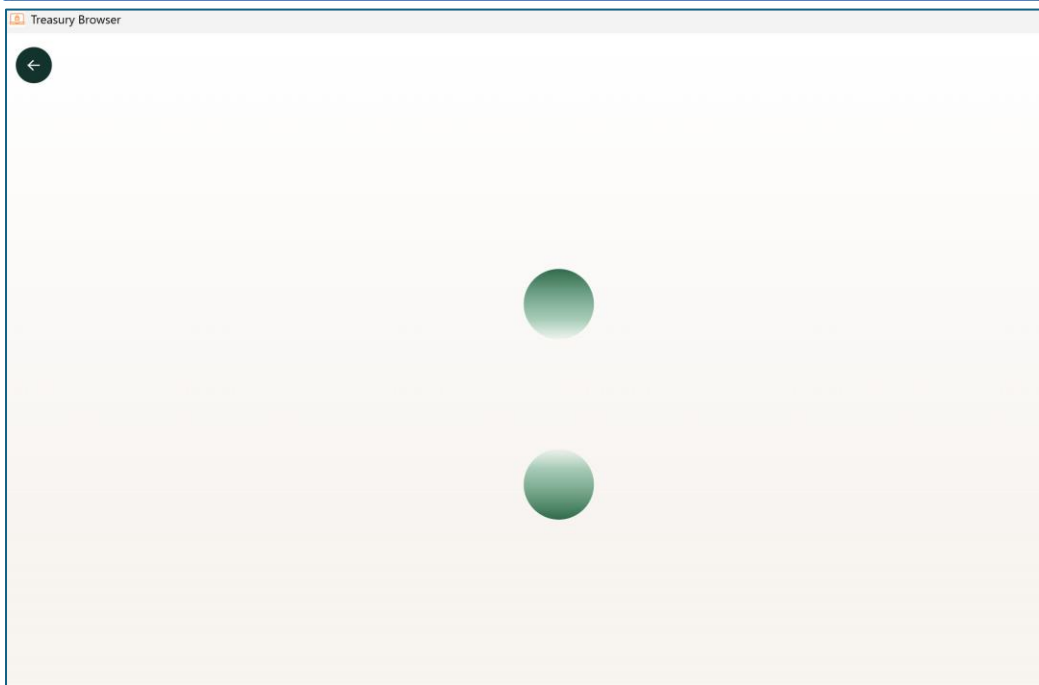

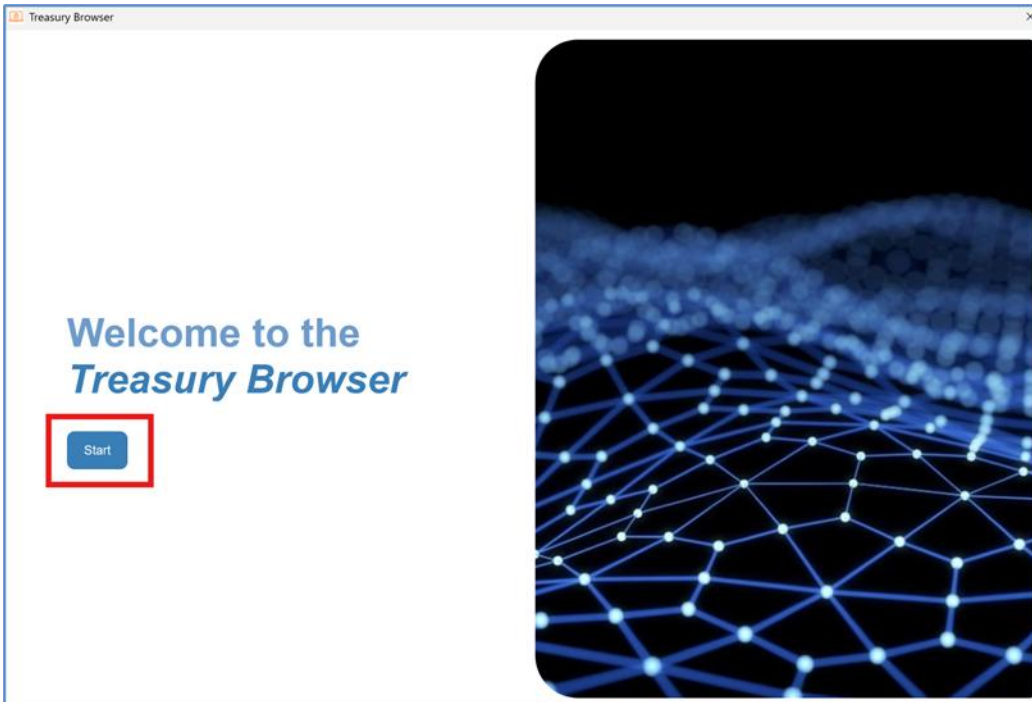

Software Activation

After the installation is complete, the Prosperity Bank Treasury Browser icon as shown below will be downloaded as a shortcut on your computer desktop. Double click on the Treasury Browser icon to launch.

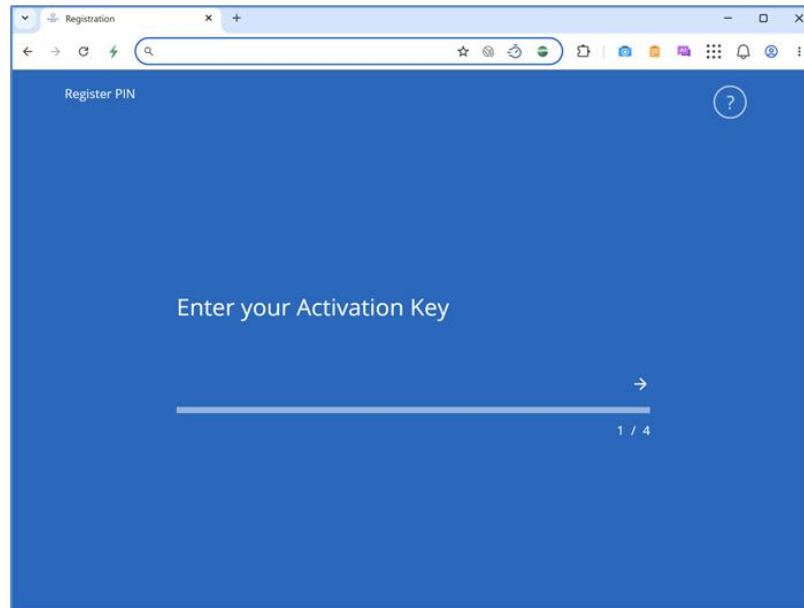

Registration

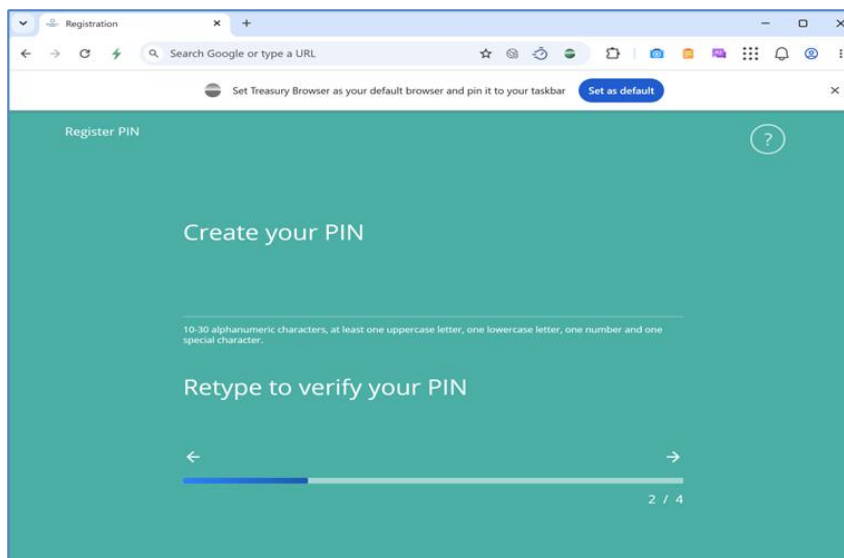

1. Launch the Treasury Browser icon and click Start.

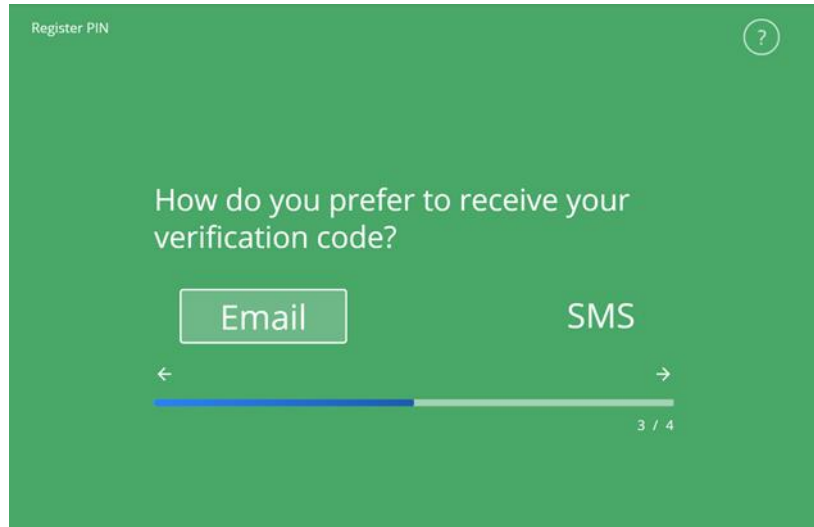

2. Enter the Activation Key provided by the Lead Admin of your Treasury Center profile. After entering the Activation Key, click on the arrow as shown below to continue.

3. Create the PIN/Password you will use to log in to Treasury Center. A PIN/Password should be 10-30 alphanumeric characters, at least one uppercase and lowercase letter, one number and one special character. You will use this PIN/Password each time you login to Treasury Center.
Prosperity Bank does not have access to your PIN/Password. Users must request an Activation Key and complete the activation process again to create a new PIN/Password.

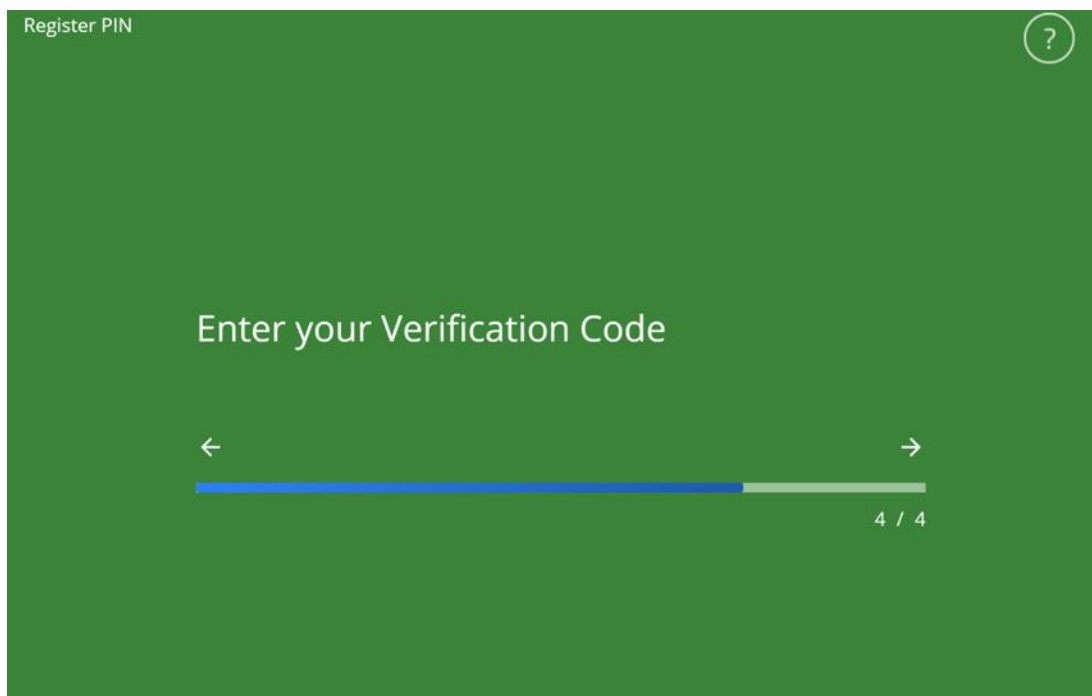

4. To confirm your identity, a user verification code will be delivered to you. Select this code to be delivered via email or SMS, then click the arrow to continue.

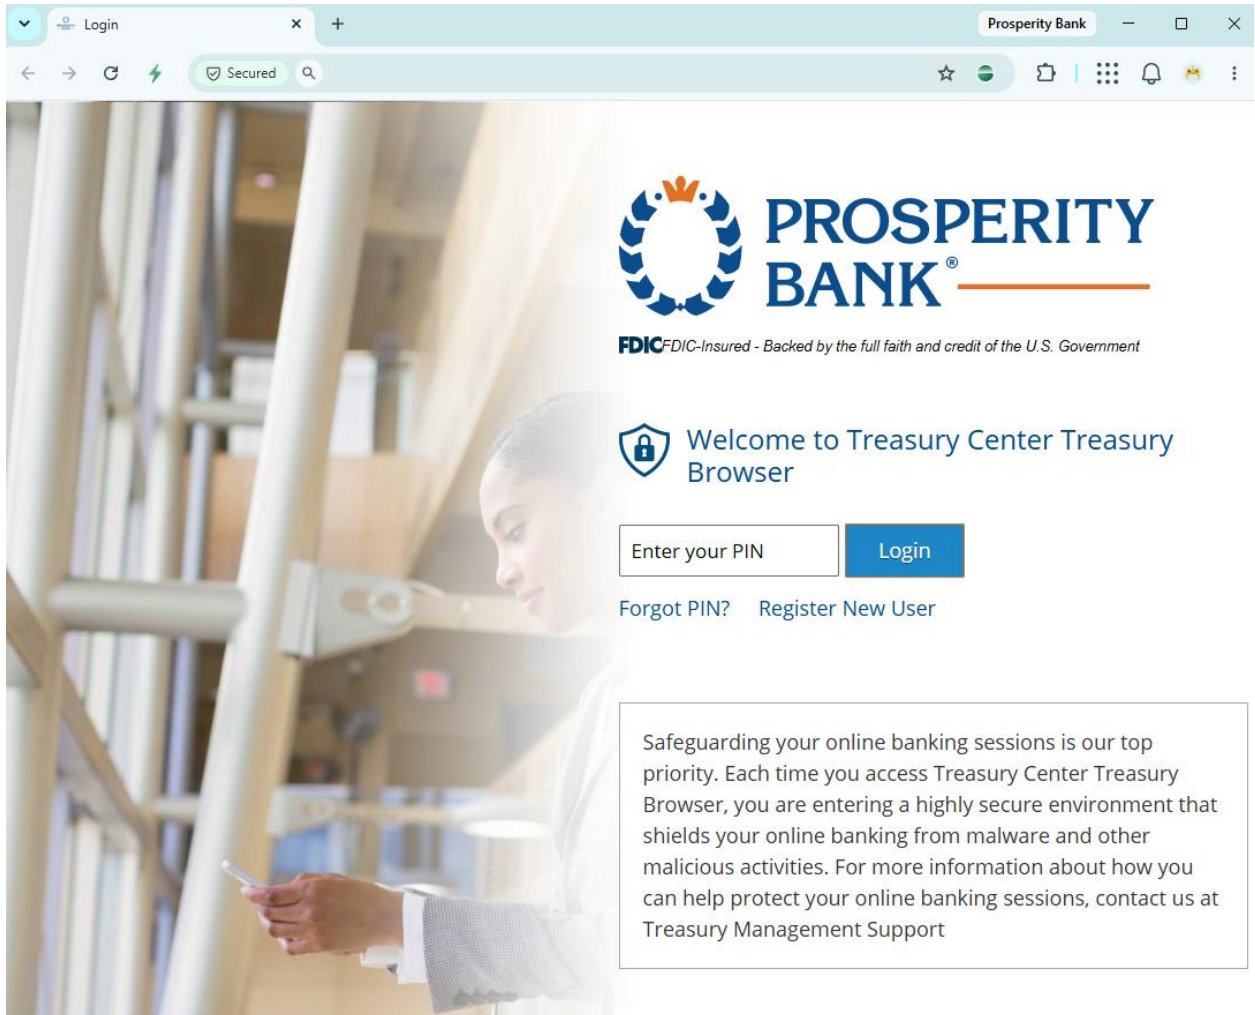

5. Enter the user verification code you received via email or SMS, then click the arrow to continue.

If you do not receive your verification code, contact Treasury Management Support at 855-888-2242 for assistance.

6. The Prosperity Treasury Browser installation and registration are now complete.
7. On the following screen, enter your PIN/Password you created earlier to login to Prosperity Bank's Treasury Center online banking.

8. Upon login to Treasury Center Treasury Browser, the secured Apps page will display the icons available to the user. Click on Treasury Online to connect to Treasury Center or click on another icon to access another Treasury service.

IMPORTANT SECURITY REMINDER

Prosperity Bank will NEVER ask you for your Treasury Center login credentials.
